MAIGA SHEA BUTTER MAGENTO STORE DEVELOPMENT

Maiga Magento Store

Clients Requirement

Maiga is a Canadian Manufacturer of shea butter based health care products. They wanted to move into direct selling through a magneto store and build their brand online. The client wanted to create a specific positioning for their unique product that appeals the target customers.

Our Role

- Web Design & Development
- Branding
- Digital Marketing & SEO

Challenges

- Maiga's prime target audience was a person above the age of 35. So the first challenge was to build a web store that is straightforward to use for that age group
- Communicating a clear brand identity and messaging through web design.

NIC DEL MER

SHOPIFY STORE DEVELOPMENT

Nic Del Mer Shopify Store

Clients Requirement

The client wanted to re-build their old magneto website from scratch to a new Shopify site.

Challenges

- To create a beautiful image heavy site that loads with lights speed.
- Payment method with EMI Options.

The image displays a promotional advertisement for the BITTO Shopify store. It features a large laptop screen showing the store's homepage with a woman in traditional Indian attire. A white overlay box on the laptop screen contains the text "USE CODE". To the right of the laptop is a smartphone displaying a grid of smaller images of women in various traditional Indian dresses. To the far right, there are two small glass containers with black straws. The background is white.

BITTO

SHOPIFY STORE

Bitto Shopify Store

Clients Requirement

Bitto is a Surat base appeal brand who specialize in Indian ethnic wear, they wanted to create an eCommerce store that has super fast loading speeds, and has a robust payment and shipping solutions for Indian as well as international transactions. They also wanted to design custom responsive theme that helps in highlighting and showcasing their beautiful ethnic designs.

OPTIONS TRADING PLATFORM

Page No **46**

The image displays two versions of the DriveWealth platform. On the left, a dark-themed mobile application interface titled "DriveWealth embedde" shows a "Positions Updated" message and a small screenshot of a trading screen. On the right, a desktop version of the website features a large banner for "DriveWealth" with the tagline "The evolution of global investing is here – in the palm of your hand." It highlights "award-winning APIs power investing for 100+ fintechs, neobanks, & wallets worldwide." Below this, sections include "Our tech is flexible enough to meet your needs – today and in the future" and "Our award-winning trading platform is designed to evolve. We continually invent new ways to help our partners increase efficiency and engagement. Offering brokerage capabilities can connect your customers more closely with your app, leading to more frequent—and more profitable—transactions." The website also lists various services: Trade, Advise, Robo, Retire, Health Savings Account (HSA), Reward, Round-Up, and Alternatives.

DriveWealth LLC

About the Project

Design and implemented architecture for platform which will be used for trading options. The project involves consuming real time options data from multiple stock exchanges around the globe and distribute data to vendors. The project is design to consume estimated 1 million events per minute.
